

RECRUITMENT OF CLINICAL TRIAL ENGINEER

ENT Department, University Hospital of Nancy, France

Post to be filled: clinical trial engineer and coordinator (1 year)

Within the ENT Department of the University Hospital of Nancy (France), under the management of Prof. C. Parietti-Winkler, MD, PhD, the candidate will be involved in several clinical trials related to the normal and pathological inner ear function, including research axes concerning both “ear and hearing” and “balance and postural control”. The candidate will be responsible for patients monitoring (fluent in French is mandatory), will be engaged in data collection and processing (questionnaires, interview...). The candidate must have a specialization in the areas of earing, balance control or neurosciences (PhD in neurosciences or equivalent). As a prerequisite to the achievement of the clinical trials, the candidate must demonstrate interpersonal skills, good knowledge in English and inferential statistics. Experience in hospital and/or clinical trials is a plus.

Review of applications will be effective until the position is filled. The contract will start beginning September (2018).

Duration: 12 months.

Take-home pay: 1740 euros/month.

Please send application (research statement, CV and cover letter) to:

Prof. C. Parietti-Winkler, ENT Department, University Hospital of Nancy, France
